

MCG Care Guidelines 24th edition customization

Effective June 1, 2021, the following new customizations will be implemented:

- Gastrointestinal Bleeding, Upper (W0170, previously ORG M-180) — Customized the Clinical Indications for admission to inpatient care by revising the hemoglobin; systolic blood pressure; pulse; melena; orthostatic hypotension; and BUN criteria.
- Gastrointestinal Bleeding, Upper Observation Care (W0171, previously OCG OC-021) — Customized the Clinical Indications for observation care by revising the systolic blood pressure and hemoglobin criteria and adding melena or hematochezia and suspected history of bleeding.

To access a detailed summary of customizations, select: **Customizations to MCG Care Guidelines 24th Edition** (path: <https://www.anthem.com/provider/policies/clinical-guidelines> > Other Criteria > MCG > Customizations to MCG Care Guidelines 24th Edition.)
