

Enhancing community health through strategic collaboration

California | Anthem Blue Cross | Medi-Cal Managed Care (Medi-Cal)

We collaborate with county health departments to address the population health needs of our members. Through our Population Needs Assessment, we prioritize community requirements and identify health disparities and service gaps. We participate in Community Health Assessments (CHA) and Community Health Improvement Plans (CHIP) to develop informed interventions. This information outlines how we work alongside local health departments to improve the health outcomes for our members.

Alpine

We develop shared goals, participate in collaborative meetings, and explore potential opportunities for funding and data sharing:

- [2022-2027 Alpine County Community Health Improvement Plan \(CHIP\)](#)

Amador

We develop activities to improve children's preventive care, participate in collaborative meetings, and explore potential opportunities for funding and data sharing:

- [2022 Sutter Amador Hospital Community Health Needs Assessment \(CHNA\)](#)
- Amador County Community Health Assessment (CHA) — *pending*
- Amador County Community Health Improvement Plan (CHIP) — *pending*

Calaveras

We develop activities to increase postpartum visits, reduce disparities in maternal care, participate in collaborative meetings, and explore potential future opportunities for funding and data sharing:

- [2023 Calaveras County Community Health Assessment \(CHA\)](#)

El Dorado

We develop shared goals, explore opportunities for data sharing, and participate in collaborative meetings. In addition, we provide funding to support the development of El Dorado's CHA/CHIP process:

- [2023-2028 El Dorado Community Health Assessment and Community Health Improvement Plan](#)

Inyo

We develop activities to improve vaccination rates in children, share deidentified immunization data, and participate in collaborative meetings. In addition, we provide funding to support the development of Inyo County's CHA/CHIP process:

- Inyo County Community Health Assessment (CHA) — *pending*
- Inyo County Community Health Improvement Plan (CHIP) — *pending*

Mono

We develop activities that improve preventive care visit rates in children, participate in CHA/CHIP surveys, and attend collaborative meetings. In addition, we provide funding to support the development of Mono County's CHA/CHIP process:

- Mono County Community Health Assessment (CHA) — *pending*
- Mono County Community Health Improvement Plan (CHIP) — *pending*

Tuolumne

We identify activities to reduce opioid and other drug-related deaths, participate in opioid coalition meetings and CHIP stakeholder meetings, and provide funding to support a harm reduction vending machine:

- [2023 Community Health Needs Assessment-Tuolumne Public Health Supplement \(CHNA\)](#)
- Tuolumne County Community Health Improvement Plan (CHIP) — *pending*

Fresno

We develop activities to improve immunization rates in children, participate in CHA/CHIP committees, share deidentified data, and attend collaborative meetings. In addition, we are in discussion to provide funding to support Fresno's CHA/CHIP process:

- [2023 Fresno Community Health Assessment \(CHA\)](#)
- [2024-2028 Fresno County Community Health Improvement Plan \(CHIP\)](#)

Madera

We develop activities to enhance the role of community health workers in referring individuals to services and sharing deidentified data regarding timely access to care and network adequacy. Additionally, we participate in quarterly steering committees and workgroups that focus on priority areas concerning domestic violence, child abuse, diabetes, heart disease, and substance use:

- [2023 Madera County Community Health Assessment \(CHA\)](#)
- [2024 Madera County Community Health Improvement Plan \(CHIP\)](#)

Tulare

We develop activities to improve depression screening of adolescents, participate in the Tulare County Access to Care Committee, Tulare County Alliance for Management and Education on Diabetes (TAME), and attend various workgroups related to their CHIP

strategies. We also participate in CHA/CHIP committees, share deidentified data, and attend collaborative meetings. Additionally, we provide funding to support the development of Tulare County's CHA/CHIP process:

- [2023 Tulare County Community Health Assessment](#)
- [2023-2028 Tulare County Community Health Improvement Plan](#)

Kings

We develop activities to improve childhood immunization rates, participate in monthly meetings with the Public Health Department and the Kings County Health Equity Advisory Panel, and attend community health assessment listening sessions. In addition, we provide funding to support the development of Kings County's CHA/CHIP process and share deidentified data to identify areas of opportunity:

- [2024-2028 Kings County Community Health Improvement Plan](#)
- [2023 Kings County Community Health Assessment](#)

Sacramento

We address housing services referrals, encourage pediatric screenings, and encourage follow-up after mental health visits to the ER. Additionally, we provide funding to support the development of Sacramento County's CHA/CHIP process and share deidentified data to identify areas of opportunity:

- [2024-2028 Sacramento County Community Health Improvement Plan](#)
- [2023 Sacramento County Community Health Assessment](#)

San Francisco

We encourage well-child visits, provide education to decrease disparities among Black and Hispanic/Latino children, and attend workgroups and collaboratives to develop activities. In addition, we provide funding to support the development of San Francisco County's CHA/CHIP process and share deidentified data to identify areas of opportunity:

- [2022 San Francisco Community Health Needs Assessment](#)
- San Francisco Community Health Assessment (CHA) — *pending*
- San Francisco Community Health Improvement Plan (CHIP) — *pending*

Santa Clara

We support the Childhood Lead Poisoning Prevention Program and Oral Health Strategic Plan, including contributing resources and expanding the number of outreach events, provider education campaigns, and referral opportunities. In addition, we provide funding to support the development of Santa Clara County's CHA/CHIP process and share deidentified data to identify areas of opportunity:

- Santa Clara Community Health Assessment (CHA) — *pending*
- Santa Clara Community Health Improvement Plan (CHIP) — *pending*

Kern

We address the maternity care gap among the Black and American Indian populations. This includes the development of a maternal care committee, increasing the doula network in Kern, and providing cultural competency training. In addition, we provide funding to support Kern County's maternal care committee and share deidentified data to identify areas of opportunity:

- [2023 Kern County Community Health Assessment](#)
- [2023 Kern County Community Improvement Plan](#)

Los Angeles

We develop activities to improve maternal care and reduce maternal disparities, attend various collaborative meetings, and share de-identified data. In addition, we are in discussion to provide funding to support Fresno's CHA/CHIP process:

- [2019 Long Beach Community Health Assessment](#)
- [2014-2020 Long Beach Community Health Improvement Plan](#)
- [Los Angeles Community Health Profiles](#)
- [2024-2029 Los Angeles Community Health Equity Improvement Plan](#)
- [2022 Pasadena Community Health Needs Assessment](#)
- [2023-2028 Pasadena Community Health Improvement Plan](#)
