

Each measure identified has criteria that is required for our pediatric members' chart review to be considered valid toward HEDIS® measurement. To make the most of your office visits toward meeting HEDIS quality measures, please document the following criteria as applicable. Well-child visits (0 to 21 years of age) must be performed by a PMP and must show evidence of all of the following:

- Physical and mental development history
- Health history and physical exam
- Health education/ anticipatory guidance

Note: Other codes may be appropriate for use per the National Committee for Quality Assurance (NCQA). This is not designed as an exclusive list, but designed to be used as a guide.

If a member is seen for a problem/sick visit and well-care visit during the same date of service, the problem/sick visit can be billed separately using modifier 25 (separate significantly identifiable evaluation and management). The problem/sick visit requires additional moderate-level evaluation to qualify as a separate service on the same date.
