

COVID-19 vaccines for youth toolkit available

This communication applies to the Medicaid program from Anthem Blue Cross and Blue Shield Healthcare Solutions and the Commercial programs from Anthem Blue Cross and Blue Shield (Anthem) in Nevada.

Anthem suggests providers review the **Pediatricians and Family Physicians Toolkit** for resources on increasing confidence in and uptake of COVID-19 vaccines among youth. Developed in partnership with the American Academy of Pediatrics, the toolkit includes information from the CDC and new, culturally tailored materials from the Health and Human Services (HHS) COVID-19 Public Education Campaign and its team of multicultural experts.

For additional information regarding the COVID-19 vaccine uptake among youth, see the following HHS website: <https://wecandothis.hhs.gov/resource/pediatricians-and-family-physicians-toolkit>.
