HEDIS Category II
coding bulletin

HEDIS® (Healthcare Effectiveness Data Information Set) is a widely used set of performance measures developed and maintained by NCQA. These are used to drive improvement efforts surrounding best practices.

Reduce the number of medical records Anthem requests from you during the HEDIS medical record review season (January to May each year) by adding specific CPT® CAT II codes to your claims. These codes will help us identify additional information about the visit and improve the accuracy of reporting HEDIS quality measures.

Prenatal and Postpartum Care (PPC)

Description	Code
Stand Alone Prenatal Visits	**0500F:** Initial prenatal care visit (report at first prenatal encounter with health care professional providing obstetrical care. Report also date of visit and, in a separate field, the date of the last menstrual period [LMP]) (Prenatal) ***or*** **0501F:** Prenatal flow sheet documented in medical record by first prenatal visit (documentation includes at minimum blood pressure, weight, urine protein, uterine size, fetal heart tones, and estimated date of delivery). Patient care opportunities

You can find patient care opportunities within the **Patient360** application located on Availity Essentials **Payer Spaces**. To access the **Patient360** application, you must have the *Patient360* role assignment. From Availity's home page, select **Payer Spaces**, then choose the health plan from the menu. Choose the **Patient360** tile from the **Payer Space Applications** menu and complete the required information on the screen. Gaps in care are located in the **Active Alerts** section of the *Member Summary*.
