

## Cancer Care Navigator

The Cancer Care Navigator (CCN) is a comprehensive cancer support solution for oncologists and Anthem Blue Cross and Blue Shield (Anthem) members who are at high risk for complications during treatment. This program is aimed at helping to simplify the complexities of cancer care for Anthem members.

Practices are given a single point of contact to connect the practice to the right people at Anthem to help lessen administrative burdens. CCN also gives the practice access to advanced predictive analytics to help identify patients at high risk for complications, allowing providers the opportunity to take preventive action and guide targeted interventions.

Members are provided with a wealth of support through supplemental services (dietitians, pharmacists, etc.), medication adherence assistance, individualized care plans, and goal setting, as well as after-hours telephonic and digital support.

The Cancer Care Navigator is the ultimate support service to improve care experience, quality of life, and give back time to focus on overall health and well-being. If you have any questions or would like further information, reach out to the Cancer Care Navigator team at **833-649-0669**.
