Over 200 of the most common languages, including American Sign Language.

Average Time to Connect:

Connect with our team of qualified interpreters in an average of **15 seconds or less.**

Section 1557 Compliant

Video Carts Available

Any Screen. Any Time, Anywhere.

When you need to connect with your patient in need, there often is not time for scheduling and determining the logistics with a qualified interpreter. CulturaLink's Video Remote Interpreting application puts the power of language at the touch of a finger.

With just a tap, you can connect to our team of qualified and experienced interpreters any time, anywhere on your favorite devices. You are able to easily provide a quality communication experience that your patients will appreciate, simplifying your process for care.

We are so confident in our quality experience that we have given the power of real-time evaluations and ratings to our users. Providers are able to rate their interpreting experience, and patients are empowered to give helpful feedback to your organization that will improve patient satisfaction scores.

Do you need quick communication of every day phrases without all the hassle? The CulturaLink VRI application gives you one-touch access to common, daily phrases in languages you need. Ask a patient what they would like to eat, in their language, with one simple touch!
