

HEDIS Benchmarks and Coding Guidelines for Quality Care

HEDIS Coding Booklet

Wisconsin | BadgerCare Plus and Medicaid SSI Programs

Table of Contents

Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis (AAB)	3
Adults' Access to Preventive/Ambulatory Health Services (AAP)	7
Antidepressant Medication Management (AMM)	12
Asthma Medication Ratio (AMR)	18
Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics (APP)	22
Blood Pressure Control for Patients With Diabetes (BPD)	27
Controlling High Blood Pressure (CBP)	31
Cervical Cancer Screening (CCS)	37
Childhood Immunization Status (CIS)	42
Chlamydia Screening in Women (CHL)	48
Cardiac Rehabilitation (CRE)	51
Appropriate Testing for Pharyngitis (CWP)	53
Eye Exam for Patients With Diabetes (EED)	57
Follow-up After Emergency Department Visit for Substance Use (FUA)	61
Follow-Up After Hospitalization for Mental Illness (FUH)	67
Follow-Up After High-Intensity Care for Substance Use Disorder (FUI)	71
Follow-Up After Emergency Department Visit for Mental Illness (FUM)	79
Glycemic Status Assessment for Patients With Diabetes (GSD)	84
Initiation and Engagement of Substance Use Disorder Treatment (IET)	88
Immunizations for Adolescents (IMA)	96
Kidney Health Evaluation for Patients with Diabetes (KED)	99
Use of Imaging Studies for Low Back Pain (LBP)	103
Lead Screening in Children (LSC)	107
Oral Evaluation, Dental Services (OED)	109
Prenatal and Postpartum Care (PPC)	110
Statin Therapy for Patients with Cardiovascular Disease (SPC)	115
Statin Therapy for Patients With Diabetes (SPD)	118
Diabetes Screening for People With Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medications (SSD)	121
Topical Fluoride for Children (TFC)	125
Appropriate Treatment for Upper Respiratory Infection (URI)	126
Well-Child Visits in the First 30 Months of Life (W30)	130
Weight Assessment and Counseling for Nutrition and Physical Activity for Children/ Adolescents (WCC)	133
Child and Adolescent Well-Care Visits (WCV)	136

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis (AAB)

This HEDIS® measure looks at the percentage of episodes for members ages 3 months and older with a diagnosis of acute bronchitis/ bronchiolitis that did not result in an antibiotic dispensing event July 1 of the year prior to the measurement year to June 30 of the measurement year.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit anytime during the measurement year
- Members who die any time during the measurement year

Description	CPT/HCPCS

Description	CPT/HCPCS
	J03.90: Acute tonsillitis, unspecified J03.91: Acute recurrent tonsillitis, unspecified

Note: The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- If a member insists on an antibiotic:
 - Refer to the illness as a chest cold rather than bronchitis; members tend to associate the label with a less-frequent need for antibiotics.
 - Write a prescription for symptom relief, such as an over-the-counter cough medicine.
 - Treat with antibiotics if associated comorbid diagnosis.
- If utilizing an electronic medical record (EMR) system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you with avoidance of antibiotic treatment for members with acute bronchitis/bronchiolitis by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

Antidepressant Medication Management (AMM)

This measure looks at the percentage of members 18 years of age and older who were treated with antidepressant medication, had a diagnosis of major depression and who remained on an antidepressant medication treatment May 1 of the year prior to the measurement year to April 30 of the measurement year.

Two rates are reported:

- **Effective Acute Phase Treatment:** The percentage of members who remained on an antidepressant medication for at least 84 days (12 weeks)
- **Effective Continuation Phase Treatment:** The percentage of members who remained on an antidepressant medication for at least 180 days (six months)

Record your efforts:

- Identify all acute and nonacute inpatient stays.
- Identify the admission and discharge dates for the stay. Either an admission or discharge during the required time frame meets criteria.

Exclusions:

- Members who did not have an encounter with a diagnosis of major depression during the 121-day period from 60 days prior to the index prescription start date (IPSD), through the IPSD and the 60 days after the IPSD
- Members who use hospice services or elect to use a hospice benefit anytime during the measurement year
- Members who died during the measurement year

Description	ICD10CM/CPT/ ICD10PCS/HCPCS

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Helpful tips

Educate your members and their spouses, caregivers, and/or guardians about the importance of:

- Complying with long-term medications.
- Not abruptly stopping medications without consulting you.
- Contacting you immediately if they experience any unwanted/adverse reactions so that their treatment can be re-evaluated.
- Scheduling and attending follow-up appointments to review the effectiveness of their medications.
- Calling your office if they cannot get their medications refilled.

- Discuss the benefits of participating in a behavioral health case management program.
- Ask your members who have a behavioral health diagnosis to provide you access to their behavioral health records if you are their primary care provider.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

We help you with antidepressant medication management by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.

Asthma Medication Ratio (AMR)

This HEDIS measure looks at the percentage of members 5 to 64 years of age who were identified as having persistent asthma and had a ratio of controller medications to total asthma medications of 0.5 or greater during the measurement year.

Record your efforts:

- Oral medication dispensing event: Multiple prescriptions for different medications dispensed on the same day are counted as separate dispensing events — If multiple prescriptions for the same medication are dispensed on the same day, sum up the days’ supply and divide by 30. Use the drug ID to determine if the prescriptions are the same or different.
- Inhaler dispensing event: All inhalers (for example, canisters) of the same medication dispensed on the same day count as one dispensing event — Medications with different drug IDs dispensed on the same day are counted as different dispensing events.
- Injection dispensing events: Each injection counts as one dispensing event. Multiple dispensed injections of the same or different medications count as separate dispensing events.
- Units of medications: When identifying medication units for the numerator, count each individual medication, defined as an amount lasting 30 days or less, as one medication unit. One medication unit equals one inhaler canister, one injection, or a 30-day or less supply of an oral medication.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year
- Members who had no asthma controller or reliever medications dispensed during the measurement year.
- Members who had a diagnosis that requires a different treatment approach than members with asthma any time during the member’s history through December 31 of the measurement year.

Helpful tip:

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

- If using an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Providing you with individual reports of your members overdue for services if needed.
- Assisting with member scheduling if needed.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

Blood Pressure Control for Patients With Diabetes (BPD)

This HEDIS measure looks at the percentage of members 18 to 75 years of age with diabetes (type 1 and 2) whose blood pressure (BP) was adequately controlled (< 140/90 mm Hg) during the measurement year.

Record your efforts:

- Members 18 to 75 years of age whose BP is < 140/90 mm Hg
- If there are multiple BPs on the same date of service, use the lowest systolic and lowest diastolic BP on that date as the representative BP
- BP readings taken by the member (digital monitor) and documented in the member’s medical record are eligible for use in reporting (provided the BP does not meet any exclusion criteria).

What does not count?

Do not include BP readings:

- Taken during an acute inpatient stay or an ED visit.
- Taken on the same day as a diagnostic test or diagnostic or therapeutic procedure that requires a change in diet or change in medication on or one day before the day of the test or procedure, with the exception of fasting blood tests.
- Taken by the member using a non-digital device such as with a manual blood pressure cuff and a stethoscope.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year
- Members receiving palliative care any time during the measurement year.
- Members who had an encounter for palliative anytime during the measurement year.
- Members 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Members must meet both frailty and advanced illness criteria to be excluded.

Description	CPT-CAT II/LOINC
Diastolic Blood Pressure	CPT-CAT II 3078F: Most recent diastolic blood pressure less than 80 mm Hg (HTN, CKD, CAD) (DM)

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- Improve the accuracy of BP measurements performed by your clinical staff by:
 - Providing training materials from the American Heart Association.
 - Conducting BP competency tests to validate the education of each clinical staff Member.
 - Making a variety of cuff sizes available.
- Instruct your office staff to recheck BPs for all members with initial recorded readings greater than systolic 140 mm Hg and diastolic of 90 mm Hg during outpatient office visits; have your staff record the recheck in member’s medical records.
- Refer high-risk members to our hypertension programs for additional education and support.
- Educate members and their spouses, caregivers, or guardians about the elements of a healthy lifestyle such as:
 - Heart-healthy eating and a low-salt diet.

Controlling High Blood Pressure (CBP)

This HEDIS measure looks at the percentage of members ages 18 to 85 years who had a diagnosis of hypertension (HTN) and whose blood pressure (BP) was adequately controlled (< 140/90 mm Hg) during the measurement year.

Record your efforts

Document blood pressure and diagnosis of HTN. Members whose BP is adequately controlled include:

- Members 18 to 85 years of age who had a diagnosis of HTN and whose BP was adequately controlled (< 140/90 mm Hg) during the measurement year.
- The most recent BP reading during the measurement year on or after the second diagnosis of hypertension:
 - If multiple BP measurements occur on the same date or are noted in the chart on the same date, use the lowest systolic and lowest diastolic BP reading.
 - If no BP is recorded during the measurement year, assume that the Member is *not controlled*.

What does not count?

- If taken on the same day as a diagnostic test or procedure that requires a change in diet or medication regimen
- On or one day before the day of the test or procedure with the exception of fasting blood tests
- Taken during an acute inpatient stay or an ED visit
- Taken by the member using a non-digital device such as with a manual blood pressure cuff and a stethoscope.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year
- Members receiving palliative care any time during the measurement year
- Members who had an encounter for palliative care anytime during the measurement year.
- Members with a diagnosis that indicates end-stage renal disease (ESRD) any time during the member's history on or prior to December 31 of the measurement year.
- Members with a procedure that indicates ESRD: dialysis any time during the member's history on or prior to December 31 of the measurement year
- Members with a diagnosis of pregnancy any time during the measurement year.

Helpful tips:

- Improve the accuracy of BP measurements performed by your clinical staff by:
 - Providing training materials from the American Heart Association.
 - Conducting BP competency tests to validate the education of each clinical staff Member.
 - Making a variety of cuff sizes available.
- Instruct your office staff to recheck BPs for all members with initial recorded readings greater than systolic 140 mm Hg and diastolic of 90 mm Hg during outpatient office visits; have your staff record the recheck in Member’s medical records.
- Refer high-risk members to our hypertension programs for additional education and support.
- Educate members and their spouses, caregivers, or guardians about the elements of a healthy lifestyle such as:
 - Heart-healthy eating and a low-salt diet.
 - Smoking cessation and avoiding secondhand smoke.
 - Adding regular exercise to daily activities.
 - Home BP monitoring.
 - Ideal body mass index (BMI).
 - The importance of taking all prescribed medications as directed.
- Remember to include the applicable Category II reporting code above on the claim form to help reduce the burden of HEDIS medical record review!
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Cervical Cancer Screening (CCS)

This HEDIS measure looks at the percentage of members 21 to 64 years of age who were recommended for routine cervical cancer screening and were screened for cervical cancer using any of the following criteria:

- Members 21 to 64 years of age who were recommended for routine cervical cancer screening and had cervical cytology performed within the last 3 years.
- Members 30 to 64 years of age who were recommended for routine cervical cancer screening and had cervical high-risk human papillomavirus (hrHPV) testing performed within the last 5 years.
- Members 30 to 64 years of age who were recommended for routine cervical cancer screening and had cervical cytology/high-risk human papillomavirus (hrHPV) cotesting within the last 5 years.

Record your efforts

Make sure your medical records reflect:

- The date when the cervical cytology was performed.
- The results or findings
 - *Unknown* is not considered a result/finding
- Notes in member’s chart if Member has a history of hysterectomy.
 - Complete details if it was a complete, total or radical abdominal, vaginal, or unspecified hysterectomy with no residual cervix; also, document history of cervical agenesis or acquired absence of cervix. (Include, at a minimum, the year the surgical procedure was performed.)

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year
- Hysterectomy with no residual cervix
- Cervical agenesis or acquired absence of cervix
- Members receiving palliative care
- Member who had an encounter for palliative care
- Members with Sex Assigned at Birth of Male at any time in the patient’s history.

Helpful tips:

- Discuss the importance of well-woman exams, mammograms, Pap tests and HPV testing with all female members between ages 21 to 64 years.
- Be a champion in promoting women’s health by reminding them of the importance of annual wellness visits.
- Refer members to another appropriate provider if your office does not perform Pap tests and request copies of Pap test/HPV co-testing results be sent to your office.
- Talk to your provider relationship management representative to determine if a health screening Clinic Day has been scheduled in your community. Our staff may be able to help plan, implement and evaluate events for a particular preventive screening, like a cervical cancer screening or a complete comprehensive women’s health screening event (only if this is offered in your practice area).
- Train your staff on the use of educational materials to promote cervical cancer screening.
- Use a tracking mechanism, (for example, EMR flags and/or manual tracking tool) to identify members due for cervical cancer screening.
- Display posters and educational messages in treatment rooms and waiting areas to help motivate members to initiate discussions with you about screening.
- Train your staff on preventive screenings or find out if we provide training.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

We help you get our members this critical service by:

- Offering you access to our *Clinical Practice Guidelines* on our provider self-service website.
- Coordinating with you to plan and focus on improving health awareness for our members by providing health screenings, activities, materials and resources if available or as needed.
- Educating members on the importance of cervical cancer screening through various sources, such as phone calls, post cards, newsletters and health education fliers if available.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

Childhood Immunization Status (CIS)

This measure looks at the percentage of children turning 2 years of age who had four diphtheria, tetanus and acellular pertussis (DTaP); three polio (IPV); one measles, mumps and rubella (MMR); three haemophilus influenza type B (HiB); three hepatitis B (Hep B), one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (Hep A); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday. The measure calculates a rate for each vaccine and three combination rates:

- DTaP (Diphtheria, Tetanus, Pertussis): At least four vaccinations with different dates of service. Do not count a vaccination administered prior to 42 days after birth.
- IPV (Inactivated Polio Vaccine): At least three vaccinations with different dates of service. Do not count a vaccination administered prior to 42 days after birth.
- MMR (Measles, Mumps and Rubella): Can only be given on or between the child's first and second birthdays.
- HiB (Haemophilus influenza type b): At least three vaccinations with different dates of service. Do not count a vaccination administered prior to 42 days after birth.
Hep B (Hepatitis B): At least three vaccinations with different dates of service. One of the three vaccinations can be a newborn hepatitis B vaccination during the 8-day period that begins on the date of birth and ends 7 days after the date of birth.
- VZV (Herpes Zoster Zostavax): At least one vaccination with a date of service on or between the child's first and second birthdays.
- PCV (Pneumococcal conjugate vaccine): At least four vaccinations with different dates of service. Do not count a vaccination administered prior to 42 days after birth.
- Hep A (Hepatitis A): At least one vaccination with a date of service on or between the child's first and second birthdays.
- RV (Rotavirus): At least two doses of the two-dose rotavirus vaccine on different dates of service:
 - or at least three doses of the three-dose rotavirus vaccine different dates of service
 - or at least one dose of the two-dose rotavirus vaccine and at least two doses of the three-dose rotavirus vaccine all on different dates of service.Do not count a vaccination administered prior to 42 days after birth.
- Flu (Influenza): At least two influenza vaccinations with different dates of service on or before the child's second birthday. Do not count a vaccination administered prior to 180 days after birth:
 - An influenza vaccination recommended for children 2 years and older administered on the child's second birthday meets criteria for one of the two required vaccinations.

MMR	1
Hib	3
Hep B	3
VZV	1
PCV	4
Hep A	1
Rotavirus	<ul style="list-style-type: none"> • Two-dose (Rotarix) • Three-dose (Rotateq) vaccine
Influenza	2 Second dose may be LAIV given on 2nd birthday

Record your efforts

Once you give our members their needed immunizations, let us and the state know by:

- Recording the immunizations in your state registry.
- Documenting the immunizations (historic and current) within medical records to include:
 - A note indicating the name of the specific antigen and the date of the immunization.
 - The certificate of immunization prepared by an authorized healthcare provider or agency.
 - For documented history of illness or anaphylaxis, there must be a note indicating the date of the event, which must have occurred by the member’s second birthday.
 - The date of the first hepatitis B vaccine given at the hospital and name of the hospital if available.
 - A note that the *Member is up to date* with all immunizations but which does not list the dates of all immunizations and the names of the immunization agents does not constitute sufficient evidence of immunization for HEDIS reporting.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year
- Members who had a contraindication to a childhood vaccine on or before their second birthday

Codes to identify immunizations:

Immunization	CPT	CVX/HCPCS/ICD10PCS
DTaP	CPT	20: diphtheria, tetanus toxoids and acellular pertussis vaccine

Helpful tips:

- If you use an EMR, create a flag to track members due for immunizations.
- Extend your office hours into the evening, early morning, or weekends to accommodate working parents.
- Develop or implement standing orders for nurses and physician assistants in your practice to allow staff to identify opportunities to immunize.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

- Enroll in the Vaccines for Children (VFC) program to receive vaccines. If you have questions about enrollment and vaccine orders, contact your state VFC coordinator. Find your coordinator when you visit cdc.gov/vaccines/programs/vfc/contacts-state.html or call 800-CDC-INFO (800-232-4636).
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We can help you get children in for their immunizations by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Providing you with individual reports of your members overdue for services if needed.
- Assisting with Member scheduling if needed.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Chlamydia Screening in Women (CHL)

This HEDIS measure looks at the percentage of women 16 to 24 years of age who were identified as sexually active and who had at least one test for chlamydia during the measurement year.

Record your efforts

Indicate the date the test was performed and the results

Exclusions:

- Members in hospice or elect to use a hospice benefit any time during the measurement year.
- Members who died during the measurement year

Based on a pregnancy test alone and who meet either of the following:

- A pregnancy test and a prescription for isotretinoin on the date of the pregnancy test or the six days after
- A pregnancy test and an x-ray on the date of the pregnancy test or the six days after

Description	CPT/LOINC
Chlamydia testing	<p>CPT 87110, 87270, 87320, 87490, 97491, 87492, 87492, 87810, 0353U</p> <p>LOINC 14463-4: Chlamydia trachomatis [Presence] in Cervix by Organism specific culture 14464-2: Chlamydia trachomatis [Presence] in Vaginal fluid by Organism specific culture 14465-9: Chlamydia trachomatis [Presence] in Urethra by Organism specific culture 14467-5: Chlamydia trachomatis [Presence] in Urine sediment by Organism specific culture 14474-1: Chlamydia trachomatis Ag [Presence] in Urine sediment by Immunoassay 14513-6: Chlamydia trachomatis Ag [Presence] in Urine sediment by Immunofluorescence 16600-9: Chlamydia trachomatis rRNA [Presence] in Genital specimen by Probe 21190-4: Chlamydia trachomatis DNA [Presence] in Cervix by NAA with probe detection 21191-2: Chlamydia trachomatis DNA [Presence] in Urethra by NAA with probe detection 23838-6: Chlamydia trachomatis rRNA [Presence] in Genital fluid by Probe 31775-0: Chlamydia trachomatis Ag [Presence] in Urine sediment 34710-4: Chlamydia trachomatis Ag [Presence] in Anal 42931-6: Chlamydia trachomatis rRNA [Presence] in Urine by NAA with probe detection 44806-8: Chlamydia trachomatis+Neisseria gonorrhoeae DNA [Presence] in Urine by NAA with probe detection</p>

Cardiac Rehabilitation (CRE)

This HEDIS measure evaluates the percentage of members 18 years and older who attended cardiac rehabilitation following a qualifying cardiac event, including myocardial infarction, percutaneous coronary intervention, coronary artery bypass grafting, heart and heart/lung transplantation or heart valve repair/replacement on or between July 1 of the year prior to the measurement year to June 30 of the measurement year. Four rates are reported:

- **Initiation:** The percentage of members who attended 2 or more sessions of cardiac rehabilitation within 30 days after a qualifying event.
- **Engagement 1:** The percentage of members who attended 12 or more sessions of cardiac rehabilitation within 90 days after a qualifying event.
- **Engagement 2:** The percentage of members who attended 24 or more sessions of cardiac rehabilitation within 180 days after a qualifying event.
- **Achievement:** The percentage of members who attended 36 or more sessions of cardiac rehabilitation within 180 days after a qualifying event.

Record your efforts

Count multiple cardiac rehabilitation sessions on the same date of service as multiple sessions. For example, if a member has two different codes for cardiac rehabilitation on the same date of service (or one code billed as two units), count this as two sessions of cardiac rehabilitation.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year
- Members receiving palliative care any time during the measurement year.
- Members who had an encounter for palliative anytime during the measurement year.
- Members 66-80 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Members must meet both frailty and advanced illness criteria to be excluded.
- Members 81 years of age and older as of December 31 of the measurement year (all product lines) with at least two indications of frailty with different dates of service during the measurement year.
- Discharged from an inpatient setting with any of the following on the discharge claim during the 180 days after the episode date:
 - Myocardial Infarction (MI)

Appropriate Testing for Pharyngitis (CWP)

This HEDIS measure evaluates the percentage of episodes for members 3 years of age and older where the member was diagnosed with pharyngitis, dispensed an antibiotic and received a group A streptococcus (strep) test for the episode on or between July 1 of the year prior to the measurement year to June 30 of the measurement year.

Record your efforts:

- Document results of all strep tests or refusal for testing in medical record.
- If antibiotics are prescribed for another condition, ensure accurate coding and documentation will associate the antibiotic with the appropriate diagnosis.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year

	<p>e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment</p> <p>G2012: Brief communication technology-based service, for example, virtual check-in, by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion</p> <p>G2250: Remote assessment of recorded video and/or images submitted by an established patient (for example, store and forward), including interpretation with follow-up with the patient within 24 business hours, not originating from a related service provided within the previous 7 days nor leading to a service or procedure within the next 24 hours or soonest available appointment</p> <p>G2251: Brief communication technology-based service, for example, virtual check-in, by a qualified health care professional who cannot report evaluation and management services, provided to an established patient, not originating from a related service provided within the previous 7 days nor leading to a service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of clinical discussion</p> <p>G2252: Brief communication technology-based service, for example, virtual check-in, by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment; 11-20 minutes of medical discussion</p> <p>T1015: Clinic visit/encounter, all-inclusive</p>

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- If a member tests negative for group A strep but insists on an antibiotic:
 - Refer to the illness as a sore throat due to a cold; members tend to associate the label with a less-frequent need for antibiotics.
 - Write a prescription for symptom relief, like over-the-counter medications.

- Educate members on the difference between bacterial and viral infections. This is the key point in the success of this measure. Use CDC handouts or education tools as needed.
- Discuss with members ways to treat symptoms:
 - Get extra rest.
 - Drink plenty of fluids.
 - Use over-the-counter medications.
 - Use the cool-mist vaporizer and nasal spray for congestion.
 - Eat ice chips or use throat spray/lozenges for sore throats.
- Educate members and their parents or caregivers that they can prevent infection by:
 - Washing hands frequently.
 - Disinfecting toys.
 - Keeping the child out of school or day care for at least 24 hours until antibiotics have been taken and symptoms have improved.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

- Members may be eligible for transportation assistance at no cost, contact Services for arrangement.

Eye Exam for Patients With Diabetes (EED)

This HEDIS measure looks at the percentage of members 18 to 75 years of age with diabetes (types 1 and 2) who had a retinal eye exam.

Record your efforts:

- A retinal or dilated eye exam by an eye care professional (optometrist or ophthalmologist) in the measurement year.
- A negative retinal or dilated eye exam (negative for retinopathy) by an eye care professional in the year prior to the measurement year.
- Bilateral eye enucleation any time during the Member’s history through December 31 of the measurement year.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year
- Members receiving palliative care any time during the measurement year.
- Members who had an encounter for palliative anytime during the measurement year.
- Members 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Members must meet both frailty and advanced illness criteria to be excluded.

Services	CPT/HCPCS/CPT-CAT II

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Services	CPT/HCPCS/CPT-CAT II
	2135-2: Hispanic or Latino 2186-5: Not Hispanic or Latino

Note: The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- For the recommended frequency of testing and screening, refer to the *Clinical Practice Guidelines* for diabetes mellitus.
- If your practice uses EMRs, have flags or reminders set in the system to alert your staff when a member’s screenings are due.
- Send appointment reminders and call members to remind them of upcoming appointments and necessary screenings.
- Follow up on lab test results, eye exam results or any specialist referral and document on your chart.
- Refer members to the network of eye providers for their annual diabetic eye exam.
- Educate your members and their families, caregivers, and guardians on diabetes care, including:
 - Taking all prescribed medications as directed.
 - Adding regular exercise to daily activities.
 - Having a diabetic eye exam each year with an eye care provider.
 - Regularly monitoring blood sugar and blood pressure at home.
 - Maintaining healthy weight and ideal body mass index.
 - Eating heart-healthy, low-calorie, and low-fat foods.
 - Stopping smoking and avoiding second-hand smoke.
 - Keeping all medical appointments; getting help with scheduling necessary appointments, screenings, and tests to improve compliance.
- Remember to include the applicable Category II reporting code above on the claim form to help reduce the burden of HEDIS medical record review.
- If utilizing an electronic medical record (EMR) system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We can help you with comprehensive diabetes care by:

- Providing online *Clinical Practice Guidelines* on our provider self-service website.
- Providing programs that may be available to our diabetic members.
- Supplying copies of educational resources on diabetes that may be available for your office.
- Providing education at your office if available in your area.

Follow-up After Emergency Department Visit for Substance Use (FUA)

This HEDIS measure evaluates the percentage of emergency department (ED) visits for members 13 years of age and older with a principal diagnosis of substance use disorder (SUD), or any diagnosis of drug overdose, who had a follow up visit for SUD during the measurement year. Two rates are reported:

- The percentage of ED visits for which the member received follow-up within 30 days of the ED visit (31 total days)
- The percentage of ED visits for which the member received follow-up within seven days of the ED visit (8 total days)

Record your efforts:

- **30 Day Follow-Up:** A member has a follow-up visit or a pharmacotherapy dispensing event 30 days after the ED visit (31 total days). Include events and visits that occur on the date of the ED visit.
- **7 Day Follow-Up:** A member has a follow-up visit or a pharmacotherapy dispensing event 7 days after the ED visit (8 total days). Include events and visits that occur on the date of the ED visit.

Exclusions:

- ED visits that result in an inpatient stay
- Members who use hospice services or elect to use a hospice benefit anytime during the measurement year
- Members who died during the measurement year

Follow-Up After Hospitalization for Mental Illness (FUH)

This HEDIS measure evaluates the percentage of discharges for members ages 6 years and older who were hospitalized for treatment of selected mental illness or intentional self-harm diagnoses and who had a follow-up visit with a mental health provider during the measurement year. Two rates are reported:

- The percentage of discharges for which the Member received follow-up within 30 days after discharge
- The percentage of discharges for which the Member received follow-up within 7 days after discharge

Exclusions:

- Exclude discharges followed by readmission or direct transfer to a nonacute inpatient care setting within the 30-day follow-up period, regardless of principal diagnosis for the readmission.
- Members who use hospice or elect to use a hospice benefit any time during the measurement year.
- Members who died during the measurement year

Note: The codes listed are informational only; this information does not guarantee reimbursement.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Helpful tips:

- Educate your members and their spouses, caregivers, or guardians about the importance of compliance with long-term medications, if prescribed.
- Encourage members to participate in our behavioral health case management program for help getting a follow-up discharge appointment within seven days and other support.
- Teach Member's families to review all discharge instructions for members and ask for details of all follow-up discharge instructions, such as the dates and times of appointments. The post discharge follow up should optimally be within seven days of discharge.
- Ask members with a mental health diagnosis to allow you access to their mental health records if you are their primary care provider.
- Telehealth services that are completed by a qualified mental health provider can be used for this measure.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you with follow-up after hospitalization for mental illness by:

- Offer current *Clinical Practice Guidelines* on our provider self-service website.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

Follow-Up After High-Intensity Care for Substance Use Disorder (FUI)

This HEDIS measure evaluates the percentage of acute inpatient hospitalizations, residential treatment, or withdrawal management visits for a diagnosis of substance use disorder among members 13 years of age and older that result in a follow-up visit or service for substance use disorder during the measurement year. Two rates are reported:

- The percentage of visits or discharges for which the member received follow-up for substance use disorder within the 30 days after the visit or discharge.
- The percentage of visits or discharges for which the member received follow-up for substance use disorder within the 7 days after the visit or discharge.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.

Follow-Up After Emergency Department Visit for Mental Illness (FUM)

This HEDIS measure evaluates the percentage of emergency department (ED) visits for members ages 6 years and older with a principal diagnosis of mental illness or intentional self-harm, who had a follow-up visit for mental illness during the measurement year. Two rates are reported:

1. The percentage of ED visits for which the member received follow-up within 30 days of the ED visit (31 total days)
2. The percentage of ED visits for which the member received follow-up within 7 days of the ED visit (8 total days)

Exclusions:

- ED visits that result in an inpatient stay
- ED visits followed by admission to an acute or nonacute inpatient care setting on the date of the ED visit or within the 30 days after the ED visit (31 total days)
- Members in hospice or using hospice services anytime during the measurement year
- Members who died during the measurement year

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Glycemic Status Assessment for Patients With Diabetes (GSD)

This measure looks at the percentage of members 18 to 75 years of age with diabetes (types 1 and 2) whose most recent glycemic status (hemoglobin A1c [HbA1c] or glucose management indicator [GMI]) was at the following levels during the measurement year:

- Glycemic Status < 8.0%.
- Glycemic Status > 9.0%.

Note: A lower rate indicates better performance for this indicator (in other words, low rates of Glycemic Status > 9% indicate better care).

Record your efforts:

- Document the result of the most recent glycemic status assessment (HbA1c or GMI) performed during the measurement year
- When identifying the most recent glycemic status assessment (HbA1c or GMI), GMI values must include documentation of the continuous glucose monitoring data date range used to derive the value. The terminal date in the range should be used to assign assessment date.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year
- Members receiving palliative care any time during the measurement year.
- Members who had an encounter for palliative anytime during the measurement year.
- Members 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Members must meet both frailty and advanced illness criteria to be excluded.

Description	CPT/CPT-CAT II/LOINC/HCPCS
HbA1c Level Greater Than or Equal to 8.0	CPT-CAT II 3046F: Most recent hemoglobin A1c level greater than 9.0% (DM) 3052F: Most recent hemoglobin A1c (HbA1c) level greater than or equal to 8.0% and less than or equal to 9.0% (DM)
HbA1c Level Less Than 8.0	CPT-CAT II 3044F: Most recent hemoglobin A1c (HbA1c) level less than 7.0% (DM)

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- For the recommended frequency of testing and screening, refer to the *Clinical Practice Guidelines* for diabetes mellitus.
- If your practice uses EMRs, have flags or reminders set in the system to alert your staff when a member's screenings are due.
- Send appointment reminders and call members to remind them of upcoming appointments and necessary screenings.
- Follow up on lab test results and document on your chart.
- Draw labs in your office if accessible or refer members to a local lab for screenings.
- Educate your members and their families, caregivers, and guardians on diabetes care, including:
 - Taking all prescribed medications as directed.
 - Adding regular exercise to daily activities.
 - Regularly monitoring blood sugar and blood pressure at home.
 - Maintaining healthy weight and ideal body mass index.
 - Eating heart-healthy, low-calorie, and low-fat foods.
 - Stopping smoking and avoiding second-hand smoke.
 - Fasting prior to having blood sugar and lipid panels drawn to ensure accurate results.
 - Keeping all medical appointments; getting help with scheduling necessary appointments, screenings, and tests to improve compliance.
- Remember to include the applicable Category II reporting code above on the claim form to help reduce the burden of HEDIS medical record review.
- If utilizing an electronic medical record (EMR) system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We can help you with comprehensive diabetes care by:

- Providing online *Clinical Practice Guidelines* on our provider self-service website.
- Providing programs that may be available to our diabetic members.
- Supplying copies of educational resources on diabetes that may be available for your office.
- Scheduling Clinic Days or providing education at your office if available in your area.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

Initiation and Engagement of Substance Use Disorder Treatment (IET)

This measure looks at the percentage of new substance use disorder (SUD) episodes that result in treatment initiation and engagement. Two rates are reported:

- **Initiation of SUD Treatment.** The percentage of new SUD episodes that result in treatment initiation through an inpatient SUD admission, outpatient visit, intensive outpatient encounter, partial hospitalization, telehealth visit or medication treatment within 14 days November 15 of the year prior to the measurement year to November 14 of the measurement year.
- **Engagement of SUD Treatment.** The percentage of new SUD episodes that have evidence of treatment engagement within 34 days of initiation.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who died during the measurement year

Initiation and engagement of alcohol and other drug dependence treatment (IET) codes:

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

How can we help?

We can help you with monitoring initiation and engagement of alcohol and other drug dependence treatment by:

- Reaching out to providers to be advocates and providing the resources to educate our members.
- Calling our behavioral health Provider Service for additional information.
- Guiding with the above noted services to drive member success in completing alcohol and other drug dependence treatment.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

Helpful tip:

- If utilizing an electronic medical record (EMR) system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

Immunizations for Adolescents (IMA)

This measure reviews the percentage of adolescents 13 years of age who had one dose of meningococcal vaccine, one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine, and have completed the human papillomavirus (HPV) vaccine series by their 13th birthday. The measure calculates a rate for each vaccine and two combination rates.

Vaccines administered on or before their 13th birthday:

- One MCV/meningococcal vaccine on or between 11th and 13th birthdays, and one Tdap or one Td vaccine on or between their 10th and 13th birthdays
- At least two doses of HPV vaccine with DOS at 146 days apart on or between the 9th and 13th birthdays:
 - Or at least three HPV vaccines with different dates of service on or between the ninth and 13th birthdays

Record your efforts

Immunization information obtained from the medical record:

- A note indicating the name of the specific antigen and the date of the immunization.
- A certificate of immunization prepared by an authorized health care provider or agency, including the specific dates and types of immunizations administered.
- Document in the medical record parent or guardian refusal.

Two-dose HPV vaccination series:

- There must be at least 146 days between the first and second dose of the HPV vaccine.

Meningococcal:

- *Do not count* meningococcal recombinant (serogroup B) (MenB) vaccines.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who died during the measurement year

Kidney Health Evaluation for Patients with Diabetes (KED)

This measure evaluates the percentage of members 18 to 85 years of age with diabetes (type 1 and type 2) who received a kidney health evaluation, defined by an estimated glomerular filtration rate (eGFR) *and* a urine albumin-creatinine ratio (uACR), during the measurement year.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year
- Members receiving palliative care any time during the measurement year
- Members who had an encounter for palliative care anytime during the measurement year.
- Members with a diagnosis of end-stage renal disease (ESRD) any time during the member’s history on or prior to December 31 of the measurement year.
- Members who had dialysis any time during the member’s history on or prior to December 31 of the measurement year
- Members 66–80 years of age as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Members must meet BOTH frailty and advanced illness criteria to be excluded.
- Members 81 years of age and older as of December 31 of the measurement year (all product lines) with at least two indications of frailty with different dates of service during the measurement year.
- Advanced illness on at least two different dates of service.
- Dispensed dementia medication

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Use of Imaging Studies for Low Back Pain (LBP)

This HEDIS measure looks at the percentage of members 18–75 years of age with a principal diagnosis of low back pain who did not have an imaging study (plain X-ray, MRI, CT scan) within 28 days of the diagnosis January 1–December 3 of the measurement year.

The measure is reported as an inverted rate. A higher score indicates appropriate treatment of low back pain (for example, the proportion for whom imaging studies did not occur).

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
 - Members who die any time during the measurement year.
 - Members 66 years of age or older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Members must meet BOTH frailty and advanced illness criteria to be excluded.
- Cancer
 - Recent trauma
 - Intravenous drug abuse
 - Neurological impairment
 - HIV
 - Spinal infection
 - Major organ transplant
 - Prolonged use of corticosteroids
 - Osteoporosis
 - Lumbar surgery
 - Spondylopathy
 - Fragility fracture
 - Spondylopathy
- Members meet any of the following criteria:

Services	CPT/ICD10CM
Uncomplicated Low Back Pain	ICD10CM M47.26: Other spondylosis with radiculopathy, lumbar region M47.27: Other spondylosis with radiculopathy, lumbosacral region M47.28: Other spondylosis with radiculopathy, sacral and sacrococcygeal region M47.816: Spondylosis without myelopathy or radiculopathy, lumbar region M47.817: Spondylosis without myelopathy or radiculopathy, lumbosacral region M47.818: Spondylosis without myelopathy or radiculopathy, sacral and sacrococcygeal region M47.896: Other spondylosis, lumbar region M47.897: Other spondylosis, lumbosacral region M47.898: Other spondylosis, sacral and sacrococcygeal region

Lead Screening in Children (LSC)

This HEDIS measure looks at the percentage of children 2 years of age who had one or more capillary or venous lead blood tests for lead poisoning by their 2nd birthday.

Record your efforts

When documenting lead screening, include:

- Date the test was reported.
- Results or findings.

Note: “Unknown” is not considered a result/finding for medical record reporting.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year

Codes to identify lead test:

Services	CPT/LOINC
Lead tests	CPT 83655 LOINC 10368-9: Lead [Mass/volume] in Capillary blood 10912-4: Lead [Mass/volume] in Serum or Plasma 14807-2: Lead [Moles/volume] in Blood 17052-2: Lead [Presence] in Blood 25459-9: Lead [Moles/volume] in Serum or Plasma 27129-6: Lead [Mass/mass] in Red Blood Cells 32325-3: Lead [Moles/volume] in Red Blood Cells 5671-3: Lead [Mass/volume] in Blood 5674-7: Lead [Mass/volume] in Red Blood Cells 77307-7: Lead [Mass/volume] in Venous blood

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- Draw Member’s blood while they are in your office instead of sending them to the lab.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. Please refer to the appropriate agency for additional guidance.

- Consider performing finger stick screenings in your practice.
- Assign one staff Member to follow up on results when members are sent to a lab for screening.
- Develop a process to check medical records for lab results to ensure previously ordered lead screenings have been completed and documented.
- Use sick and well-child visits as opportunities to encourage parents to have their child tested.
- Include a lead test reminder with lab name and address on your appointment confirmation/reminder cards.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you with lead screening in children by:

Oral Evaluation, Dental Services (OED)

This HEDIS measure looks at the percentage of members under 21 of age who received a comprehensive oral evaluation with a dental provider during the measurement year.

Record your efforts:

- Date of evaluation

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year

Codes to identify lead test:

Services	CDT
Oral Evaluation	CDT D0120: Periodic oral evaluation - established patient D0145: Oral evaluation for a patient under three years of age and counseling with primary caregiver D0150: Comprehensive oral evaluation - new or established patient

Note: The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

Prenatal and Postpartum Care (PPC)

This HEDIS measure looks at the percentage deliveries of live births on or between October 8 of the year prior to the measurement year and October 7 of the measurement year. For these members, the measure assesses the following facets of prenatal and postpartum care:

- Timeliness of prenatal care: The percentage of deliveries that received a prenatal care visit in the first trimester on or before the enrollment start date or within 42 days of enrollment in the organization.
- Postpartum Care: The percentage of deliveries that had a postpartum visit on or between 7 and 84 days after delivery.

Record your efforts

Prenatal care visit must include one of the following:

- Diagnosis of pregnancy
- A physical examination that includes one of the following:
 - Auscultation for fetal heart tone
 - Pelvic exam with obstetric observations
 - Measurement of fundus height
- Evidence that a prenatal care procedure was performed such as one of the following:
 - Obstetric panel including hematocrit, differential WBC count, platelet count, hepatitis B surface antigen, rubella antibody, syphilis test, RBC antibody screen, Rh and ABO blood typing)
 - TORCH antibody panel alone
 - A rubella antibody test/titer with an Rh incompatibility (ABO/Rh) blood typing
 - Ultrasound of a pregnant uterus
- Documentation of LMP, EDD or gestational age in conjunction with *either* of the following.
 - Prenatal risk assessment and counseling/education
 - Complete obstetrical history

Postpartum care visit on or between 7 and 84 days after delivery

Documentation in the medical record must include a note indicating the date when a postpartum visit occurred and any of the following:

- Pelvic exam
- Evaluation of weight, BP, breasts, and abdomen
- Notation of *breastfeeding* is acceptable for the *evaluation of breasts* component
- Notation of postpartum care, including, but not limited to:
 - Notation of *postpartum care, PP care, PP check, 6-week check*
 - A preprinted *Postpartum Care* form in which information was documented during the visit

Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

- Perineal or cesarean incision/wound check
- Screening for depression, anxiety, tobacco use, substance use disorder or preexisting mental health disorders
- Glucose screening for women with gestational diabetes
- Documentation of any of the following topics:
 - Infant care or breastfeeding
 - Resumption of intercourse, birth spacing or family planning.
 - Sleep/fatigue
 - Resumption of physical activity and attainment of healthy weight

Exclusions:

- Non-live births
- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Note: These codes are used to capture encounter data for individual prenatal and postpartum visits. Category II codes do not generate payment but help with more accurate reporting. The designated CPT Category II codes should be used in conjunction with the date of the prenatal or postpartum visit.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Helping identify community resources, such as health education classes that may be available in your area.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

Helpful tip:

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management provider relationship management representative for additional details and questions.

Statin Therapy for Patients with Cardiovascular Disease (SPC)

This HEDIS measure looks at the percentage of males 21 to 75 years of age and females 40 to 75 years of age during the measurement year, who were identified as having clinical atherosclerotic cardiovascular disease (ASCVD) and met the following criteria. The following rates are reported:

- Received statin therapy: Members who were dispensed at least one high-intensity or moderate-intensity statin medication during the measurement year.
- Statin adherence 80%: Members who remained on a high-intensity or moderate-intensity statin medication for at least 80% of the treatment period (treatment period begins with the earliest dispensing event for any high-intensity or moderate-intensity statin medication during the measurement year).

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year
- Members with a diagnosis of pregnancy during the measurement year or the year prior to the measurement year.
- In vitro fertilization in the measurement year or the year prior to the measurement year.
- Dispensed at least one prescription for clomiphene during the measurement year or the year prior to the measurement year.
- End stage renal disease (ESRD) during the measurement year or the year prior to the measurement year.
- Dialysis during the measurement year or the year prior to the measurement year.
- Cirrhosis during the measurement year or the year prior to the measurement year.
- Myalgia, myositis, myopathy, or rhabdomyolysis during the measurement year.
- Members receiving palliative care any time during the measurement year.
- Members who had an encounter for palliative anytime during the measurement year.
- Members 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Members must meet both frailty and advanced illness criteria to be excluded

High- and Moderate-Intensity Statin Medications

Description	Prescription
High-intensity statin therapy	Atorvastatin 40-80 mg

Statin Therapy for Patients With Diabetes (SPD)

This HEDIS measure looks at the percentage of members 40 to 75 years of age during the measurement year with diabetes who do not have clinical atherosclerotic cardiovascular disease (ASCVD) who met the following criteria.

Two rates are reported:

- Received statin therapy: members who were dispensed at least one statin medication of any intensity during the measurement year
- Statin Adherence 80%: members who remained on a statin medication of any intensity for at least 80% of the treatment period (treatment period begins with the earliest dispensing event for any statin medication during the measurement year).

Record your efforts:

- Document review of continued use of prescribed medications during member visits
- Document evidence of exclusion criteria

Exclusions:

- Members with at least one of the following during the year prior to the measurement year in any setting:
 - Myocardial Infarction (MI)
 - Coronary artery bypass graft (CABG)
 - Percutaneous Coronary Intervention (PCI)
 - Other revascularization procedure
- Members who had at least one encounter with a diagnosis of IVD during both the measurement year and the year prior to the measurement year.
- Members with a diagnosis of pregnancy during the measurement year or year prior to the measurement year.
- In vitro fertilization in the measurement year or year prior to the measurement year.
- Dispensed at least one prescription for clomiphene during the measurement year or the year prior to the measurement year.
- End stage renal disease (ESRD) during the measurement year or the year prior to the measurement year.
- Dialysis during the measurement year or the year prior to the measurement year.
- Cirrhosis during the measurement year or the year prior to the measurement year.
- Myalgia, myositis, myopathy or rhabdomyolysis during the measurement year.
- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Members receiving palliative care any time during the measurement year.

Diabetes Screening for People With Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medications (SSD)

This HEDIS measure looks at the percentage of members 18 to 64 with schizophrenia, schizoaffective disorder, or bipolar disorder and who were dispensed an antipsychotic medication and had a diabetic screening test during the measurement year.

Record your efforts:

- Document review of continued use of prescribed medications during Member visits
- Document evidence of exclusion criteria

An antipsychotic medication dispensed event during the measurement year identified by claim/encounter data or pharmacy data and a glucose test or an HbA1c test performed during the measurement year, as identified by claim/encounter or automated laboratory data.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Members with diabetes
- Members who had no antipsychotic medications dispensed during the measurement year.

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee reimbursement.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Helping identify community resources, such as health education classes that may be available in your area.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

Helpful tip:

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

Topical Fluoride for Children (TFC)

This HEDIS measure looks at the percentage of members 1 to 4 years of age who received at least two fluoride varnish applications during the measurement year.

Record your efforts:

- Two or more fluoride varnish applications on different dates of services

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who died during the measurement year

Codes to identify lead test:

Services	CPT/CDT
Application of Fluoride Varnish	CPT 99188 CDT D1206: Topical application of fluoride varnish

Appropriate Treatment for Upper Respiratory Infection (URI)

This HEDIS measure looks at the percentage of episodes for members 3 months of age and older with a diagnosis of upper respiratory infection (URI) that did not result in a dispensed antibiotic dispensing event.

A higher rate indicates appropriate URI treatment (in other words, the proportion of episodes that did not result in an antibiotic dispensing event July 1 of the year prior to the measurement year to June 30 of the measurement year).

Record your efforts:

- Document results of all strep tests or refusal for testing in medical records.
- If antibiotics are prescribed for another condition, ensure accurate coding and documentation will associate the antibiotic with the appropriate diagnosis.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.

Helpful tips:

- If a member tests negative for group A strep but insists on an antibiotic:
 - Refer to the illness as a sore throat due to a cold; members tend to associate the label with a less-frequent need for antibiotics.
 - Write a prescription for symptom relief, like over-the-counter medications.
- Educate members on the difference between bacterial and viral infections. This is the key point in the success of this measure.
- Discuss with members ways to treat symptoms:
 - Get extra rest.
 - Drink plenty of fluids.
 - Use over-the-counter medications.
 - Use the cool-mist vaporizer and nasal spray for congestion.
 - Eat ice chips or use throat spray/lozenges for sore throats.
- Educate members and their parents or caregivers that they can prevent infection by:
 - Washing hands frequently.
 - Disinfecting toys.
 - Keeping the child out of school or day care for at least 24 hours until antibiotics have been taken and symptoms have improved.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

Well-Child Visits in the First 30 Months of Life (W30)

This HEDIS measure looks at the percentage of members who had the following number of well-child visits with a PCP during the last 15 months. The following rates are reported:

- Well-Child Visits in the First 15 Months: children who turned 15 months old during the measurement year: Six or more well-child visits
- Well-Child Visits for Age 15 Months to 30 Months: children who turned 30 months old during the measurement year: Two or more well-child visits

Record your efforts

Documentation from the medical record must include a note indicating a visit with a PCP, the date when the well-child visit occurred and evidence of *all* of the following:

- A health history: Health history is an assessment of the Member’s history of disease or illness. Health history can include, but is not limited to, past illness (or lack of illness), surgery or hospitalization (or lack of surgery or hospitalization) and family health history.
- A physical developmental history: Physical developmental history assesses specific age-appropriate physical developmental milestones, which are physical skills seen in children as they grow and develop.
- A mental developmental history: Mental developmental history assesses specific age-appropriate mental developmental milestones, which are behaviors seen in children as they grow and develop.
- A physical exam (for example, height, weight, BMI, heart, lungs, abdomen, more than one system assessed)
- Health education/anticipatory guidance: Health education/anticipatory guidance is given by the health care provider to parents or guardians in anticipation of emerging issues that a child and family may face.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.

Note: The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- Use your member roster to contact members who are due for an exam or are new to your practice.
- Schedule the next visit at the end of the appointment.
- If you use EMRs, consider creating a flag to track members due or past due for a visit. If you do not use EMRs, consider creating a manual tracking method. Sick visits may be a missed opportunity for your member to get a wellness exam.
- Consider extending your office hours into the evening, early morning, or weekend to accommodate working parents.
- Remember to include the applicable ICD-10-CM code above on the claim form to help reduce the burden of HEDIS medical record review!
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Providing individualized reports of your members overdue for services.
- Encouraging members to get preventive care through our programs. Contact your provider relationship management representative for more information.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents (WCC)

This HEDIS measure looks at the percentage of members ages 3 to 17 years who had an outpatient visit with a PCPs or OB/GYN and who had evidence of the following during the measurement year:

- *BMI Percentile documentation
- Counseling for Nutrition
- Counseling for Physical Activity

*Because BMI norms for youth vary with age and gender, this measure evaluates whether BMI percentile is assessed rather than an absolute BMI value.

Record your efforts

Three separate rates are reported:

- Height, weight and BMI percentile (not BMI value):
 - May be a BMI growth chart if utilized
- Counseling for nutrition (diet):
 - Services rendered during a telephone visit, e-visit or virtual check-in meet criteria
- Counseling for physical activity (sports participation/exercise):
 - Services rendered for obesity or eating disorders may be used to meet criteria
 - Services rendered during a telephone visit, e-visit or virtual check-in meet criteria

Exclusions:

- Members with a diagnosis of pregnancy
- Members who use hospice services or elect to use a hospice benefit any time during the measurement year
- Members who die any time during the measurement year

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of members. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our members. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Description	CPT/HCPCS/ICD10CM/LOINC
	Z68.54: Body mass index [BMI] pediatric, greater than or equal to 95th percentile for age LOINC 59574-4: Body mass index (BMI) [Percentile] 59575-1: Body mass index (BMI) [Percentile] Per age 59576-9: Body mass index (BMI) [Percentile] Per age and sex
Nutrition Counseling	CPT 97802, 97803, 97804 HCPCS G0270: Medical nutrition therapy; reassessment and subsequent intervention(s) following second referral in same year for change in diagnosis, medical condition or treatment regimen (including additional hours needed for renal disease), individual, face to face with the patient, each 15 minutes G0271: Medical nutrition therapy, reassessment and subsequent intervention(s) following second referral in same year for change in diagnosis, medical condition, or treatment regimen (including additional hours needed for renal disease), group (2 or more individuals), each 30 minutes G0447: Face-to-face behavioral counseling for obesity, 15 minutes S9449: Weight management classes, non-physician provider, per session S9452: Nutrition classes, non-physician provider, per session S9470: Nutritional counseling, dietitian visit
Physical Activity Counseling	HCPCS G0447: Face-to-face behavioral counseling for obesity, 15 minutes S9451: Exercise classes, non-physician provider, per session
Encounter for Physical Activity Counseling	ICD10CM Z02.5: Encounter for examination for participation in sport Z71.82: Exercise counseling

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- Measure height and weight at least annually and document the BMI percentile for age in the medical record.
- Consider incorporating appropriate nutritional and weight management questioning and counseling into your routine clinical practice.

- Document any advice you give the Member.
- Document face-to-face discussion of current nutritional behavior, like appetite or meal patterns, eating and dieting habits, any counselling or referral to nutrition education, any nutritional educational materials that were provided during the visit, anticipatory guidance for nutrition, eating disorders, nutritional deficiencies, underweight, and obesity or overweight discussion.
- Document face-to-face discussion of current physical activity behaviors, like exercise routines, participation in sports activities or bike riding, referrals to physical activity, educational material that was provided, anticipatory guidance on physical activity, and obesity or overweight discussion.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Helping identify community resources, such as health education classes that may be available in your area.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

Child and Adolescent Well-Care Visits (WCV)

This HEDIS measure looks at the percentage of members ages 3 to 21 years who had at least one comprehensive well-care visit with a PCP or an OB/GYN practitioner during the measurement year.

Record your efforts

Documentation must include a note indicating a visit to a PCP, the date when the well-child visit occurred and evidence of *all* of the following:

- A health history: Health history is an assessment of the Member’s history of disease or illness. Health history can include, but is not limited to, past illness (or lack of illness), surgery or hospitalization (or lack of surgery or hospitalization) and family health history.
- A physical developmental history: Physical developmental history assesses specific age-appropriate physical developmental milestones, which are physical skills seen in children as they grow and develop.
- A mental developmental history: Mental developmental history assesses specific age-appropriate mental developmental milestones, which are behaviors seen in children as they grow and develop.
- A physical exam (for example, height, weight, BMI, heart, lungs, abdomen, more than one system assessed)
- Health education/anticipatory guidance: Health education/anticipatory guidance is given by the health care provider to parents or guardians in anticipation of emerging issues that a child and family may face.

Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.

Description	CPT/HCPCS

Description	CPT/HCPCS
	S0302: Completed early periodic screening diagnosis and treatment (epsdt) service (list in addition to code for appropriate evaluation and management service)
CDC Race and Ethnicity	1002-5: American Indian or Alaska Native 2028-9: Asian 2054-5: Black or African American 2076-8: Native Hawaiian or Other Pacific Islander 2106-3: White 2135-2: Hispanic or Latino 2186-5: Not Hispanic or Latino

Note: The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- Use your member roster to contact members who are due for an annual exam.
- Schedule the next visit at the end of the appointment.
- If you use EMRs, consider creating a flag to track members due or past due for preventive services. If you do not use EMRs, consider creating a manual tracking method for well checks. Sick visits may be missed opportunities for your member to get health checks.
- Consider extending your office hours into the evening, early morning, or weekend to accommodate working parents.
- Remember to include the applicable ICD-10-CM code above on the claim form to help reduce the burden of HEDIS medical record review!
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Providing individualized reports of your members overdue for services.
- Encouraging members to get preventive care through our programs.
- Members may be eligible for transportation assistance at no cost, contact Member Services for arrangement.

Patient care opportunities

You can find patient care opportunities within the Patient360 application located on Availity Essentials Payer Spaces. To access the Patient360 application you must have the Patient360 role assignment. From Availity’s
